

## ENV-02 EIA in Singapore - and elsewhere

Objective:	The participants will achieve an overview of Singaporean and international EIA regulation and modalities
Contents:	<p>The EIA process is adopted in the national legislation in most countries and is based on more or less the same principles. In Singapore EIAs are conducted for all major construction works to ensure that environmental impacts that may arise from the project are taking into account in the approval process. The course covers</p> <ul style="list-style-type: none"><li>• Overview of EIA scoping and approach; when and how to conduct an EIA</li><li>• Overview of national EIA regulation: Background, history, legal and administrative framework, policies and practices</li><li>• Transboundary EIA: Examples of transboundary and international environmental policies and practices</li></ul>
Who should attend:	Engineers and technical specialists from the public and private sector with a need of an introduction to the subject. Participants would have some background from environmental or water management. The course is also suitable for environmental managers in private companies
Courseware:	Selected slides and background documents as handouts and/or electronic files
Certification:	Attendance certificate (subject to 80 percent attendance)
Duration:	2 lessons (2 hours each) plus some homework
Costs:	<p>\$ 300 per participant (inclusive of GST)</p> <p><i>A discount of 20 percent</i> applies to 3 or more participants from the same organization in the same course</p>
